

# What, Why or Where

*The start of a new Arbordale series!*

Weather changes daily. Sometimes it can even change from one moment to another—like a sudden storm. Weather affects our daily lives from what we wear to what outdoor activities (or lack thereof) we can do. Learning about weather and how to dress and prepare for it is an important skill to learn. Maybe even more important is the skill of observation. By asking simple questions, children become engaged and can start to observe and make correlations about the weather around them so they will understand how the weather impacts their lives.
