

Gopher to the Rescue!

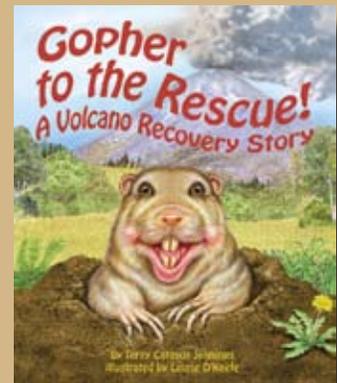

A Volcano Recovery Story

2012 New Release from
Sylvan Dell Publishing

Written by Terry Catasús Jennings
Illustrated by Laurie O'Keefe

How can the mountain recover?

The forest animals are surprised when a volcano suddenly explodes covering the land in gritty, warm ash and rock that make it unlivable for most plants and animals. But Gopher survives. He still has a home in his underground burrow and food to eat. How does gopher help bring life back to the mountain? Scientists spent years observing the recovery following the eruption of Mount St. Helens, and this fictionalized story is based on their surprising observations. **(Ages 4-9)**

Terry Catasús Jennings (pronounced cat ah soos) has been heavily involved in the arts for the past 20 years, serving as a Cultural Arts Chair in her children’s schools. She is a contributor to the National Science Resource Center’s Science and Technology for Children and Science and Technology Concepts for Middle Grades Series. Her articles have appeared in the Washington Post, Long Island News Day, and Ranger Rick and she wrote a family humor column for her local newspaper. *Gopher to the Rescue!* is her first picture book. Visit her website at www.terryjennings.wordpress.com.

Laurie O’Keefe’s undergraduate degree in zoology and her graduate degree in human anatomy have helped with her scientific illustrations in the medical and scientific fields. Her client list reads like a “Who’s Who” in scientific illustrations from text books and magazines to zoos and museums. This is her first picture book. Visit her website at www.laurieokeefe.com.
