

Animal Skins

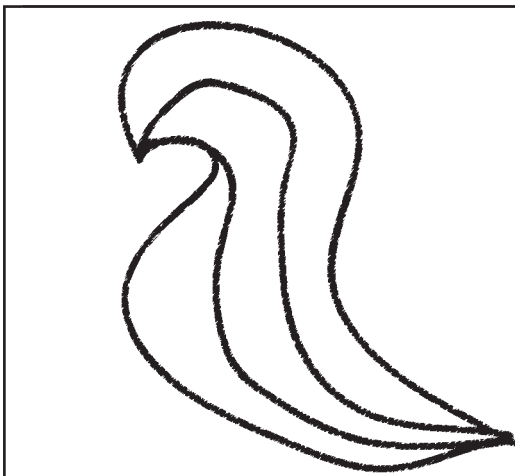

Can you guess the animal from their skins and color them in?

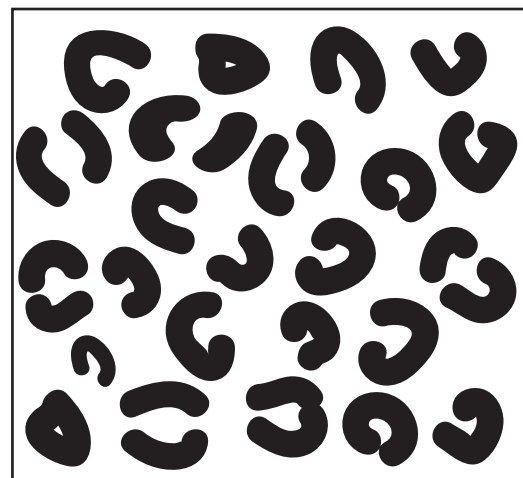

I have feathers that make up about 60% of my body length. With such a large tail, it's amazing that I fly. I am a...

When I grow up, I lose my spots. But while I am small, these spots keep me hidden from predators. I am a..

My tail is famous for warning of a terrible smell to come. The black and white pattern is easily seen, so predators know to stay away! I am a...

My spots are called rosettes and hide me very well as I slumber in the treetops. I am a...
