Interactive ebook: 9781607185161 \$6.95 - \$50
Audio: 9781607185925 \$0.99

Complete the Series

Hearing is an important sense for animals' survival. Ears give animals vital information to help them find food or listen for predators ready to attack. This continuation of Mary Holland's award-winning *Animal Anatomy and Adaptations* series features a wide variety of animal ears and how animals use them. Did you know that some animals have ears on their legs? Like the eyes, mouths, legs, and tails featured in previous books, animal ears come in a wide variety of shapes and sizes—a perfect match for each animal's needs.

Meet Mary Holland

Mary Holland is a naturalist, nature photographer, columnist, and award-winning author with a life-long passion for natural history. After graduating from the University of Michigan's School of Natural Resources, Mary worked as a naturalist at the Museum of the Hudson Highlands in New York state, directed the state-wide Environmental Learning

for the Future program for the Vermont Institute of Natural Science, worked as a resource naturalist for the Massachusetts Audubon Society, and designed and presented her own "Knee-High Nature Programs" for libraries and elementary schools throughout Vermont and New Hampshire.

Her other children's books with Arbordale include *Yodel the Yearling*, *Otis the Owl*, *Ferdinand Fox's First Summer* (NSTA / CBC Most Outstanding Science Trade Book and Moonbeam Children's Book Award), *The Beavers' Busy Year*, *Animal Eyes*, *Animal Legs*, *Animal Tails*, and *Animal Mouths* (NSTA / CBC Most Outstanding Science Trade Book). Mary's book *Naturally Curious: a Photographic Field Guide and Month-by-Month Journey Through the Fields, Woods and Marshes of New England* won the 2011 National Outdoor Book Award for the Nature Guidebook category. *Naturally Curious Day by Day* was published in 2016. Mary lives in Vermont with her lab, Emma. Visit Mary's blog at naturallycuriouswithmaryholland.wordpress.com.

Mary says...

"I feel so very lucky, as each day I get to discover something new. I never know what I'm going to find. I head outdoors, and go on what is to me very much like an Easter egg hunt – I look for animals and their signs and rarely do I come home without having found something new to observe and admire."

Praise for the *Animal Anatomy and Adaptations* Series

Animal lovers will appreciate the stunning photographs; captivating visuals of snakes, owls, and turtles dominate readers' attention while the text engages readers through vocabulary and questions. - *Library Media Connection*

As I read this book, I immediately thought of how much fun it would be to have a young audience and share the joy of the natural world! - *NSTA Recommends*

The design (black text set against a white background, along with numerous photos) makes this selection a good read-aloud option in a science unit covering animal anatomy. - *School Library Journal*
