

ABOUT THE BOOK

The colorful flowers in Mama's garden reveal a strange-looking creature. "What is it? Does it sting, does it bite?" Join in this photographic journey as the young girl and her mother care for the caterpillar. Watch as it transforms into a chrysalis and then emerges as a beautiful monarch butterfly. How can the young girl "claim" the butterfly as her own but still let it go free?

"This book provides an excellent introduction to the natural world for children through rearing of monarchs. The book also provides a fun learning experience, giving kids insight into the complexity of the miraculous natural world, as exhibited by the monarch butterfly and its fantastic migration."
—Billy McCord, SC Department of Natural Resources Biologist
