Arbordale is on a mission to improve child literacy with science and math through fun to read picture books. Using prose and pictures, children are delighted with stories of their favorite animals, planets, or even places. This leads to the exploration of facts and learning activities in each book’s For Creative Minds pages. Arbordale carefully designs each book to portray the chosen subject accurately. Vetted by experts in that field, and aligned to common core and state standards, each book is an asset to educational programs. Arbordale has grown to include a diverse group of authors and illustrators from across the country and honored to have won many awards since its inception in 2004.
