

**For Immediate Release**

## Free Summer Reading Program from Arbordale Publishing

*Read around the world with free interactive ebooks*

Mount Pleasant, SC (May 3, 2017) -- Warmer weather and longer days say summer is near, and this year Arbordale introduces Summer Reading Around the World. This free program includes 25 interactive ebooks, a passport to reading, and the opportunity to earn hardcover books.

To prevent the summer slide, and give young readers the opportunity to learn about environments and habitats around the world, Arbordale has selected books that feature animals and places near and far. Learning about science and math is fun through stories, and Arbordale's signature "For Creative Minds" section extends the themes within the story.

A downloadable passport magnifies the fun, and voracious readers are able to return their passport for their very own book and reading certificate. Additionally, educators and librarians can earn up to 25 free books and online access to the entire library on Arbordale's Fun eReader® by sending in groups of passports.

The Fun eReader platform allows for easy access, and families on the go are able to download the books onto tablets via the Fun eReader app. Each interactive ebook includes English & Spanish text and audio with speed control, word highlighting, and some now have tappable animal sounds.

Perfect for a rainy day or community programs, Arbordale has included special bingo cards, crafts, and activities for download. New activities will be added throughout the summer via the publisher's social media channels @ArbordaleKids.

The free ebook access is available through the Summer Reading site at Arbordale Publishing ([www.arbordalepublishing.com/SummerReading.php](http://www.arbordalepublishing.com/SummerReading.php)). Parents, educators and librarians will find passport instructions and submission information with details to redeem the passports for free books.

Questions about the program can be sent to [info@arbordalepublishing.com](mailto:info@arbordalepublishing.com).

**About Us:**

Arbordale is on a mission to improve child literacy with science and math through fun-to-read books. Using prose and pictures, children are delighted with stories of their favorite animals, planets, or even places. This leads to the exploration of facts and learning activities in each book's "For Creative Minds" pages. Arbordale carefully designs each book to portray accurately the chosen subject. Vetted by experts in that field, and aligned to standards, and leveled for reading, each book is an asset to educational programs. Arbordale has grown to include a diverse group of authors and illustrators from across the country, and honored to have won more than 80 national and state book awards since its inception in 2005.
